

With Mindfulness Month just around the corner in May, we take a look at the incredible new product from Maletti, the Eden Plus Wash Unit. Deemed as the “New Frontier of Wellbeing” this product is unlike no other wash unit, having a considerable amount of benefits for both the stylist and the client to ensure the stylist can do their job their very best and with ease, and that the client has the most comfortable experience in the salon that they would not receive anywhere else.

Benefits For The Stylist

- Designed by Maletti, the Eden Plus Wash Unit is superior in quality, manufactured to create the very best in luxury, professional furniture that looks incredible in the salon and ensures client comfort.
- Provides clients with the ultimate experience ensuring they come back to the salon, as the furniture creates a real wellness centre where clients can relax and have their hair treated.
- Allows the stylist to be able to provide hair treatments more effectively for the client with the use of the hot steam treatment that increase the effects of various active ingredients and penetrate into the hair and scalp encouraging them to perform better. Atomised cold water also helps to seal the hair cuticle, absorbing hydrating treatments and providing the hair with mega shine that's free from frizz.
- There have been many issues in the past with clients complaining about basins at the back wash station of a salon not being very supportive and causing them pain. As the wash unit is mechanical, it will ensure client neck comfort at all times, avoiding complaints being made in the salon.
- The Eden Wash Unit can also be paired with the Maletti Madre Stool, which is great for the stylist as it can be elevated, providing the stylist a great position for working on their client. The stool also tilts and turns for the operator, allowing them to move in the right ways whilst working on the client and they don't need to stretch their arms to reach the clients head - effectively ensuring they are comfortable at all times whilst performing any treatments.

Benefits For The Client

- Due to the steam and atomised cold water, clients are left with super hydrated, shiny hair that's free from frizz and looks and feels incredible.
- The client has the most comfortable, relaxing experience in due to piece of furniture's incredible design and also as the Eden Plus is a reclining massage chair providing continual back massage with RGB LED lights with yellow, green, red, purple, orange and blue colours.
- Mechanic basin ensures clients neck is supported and comfortable at all times when they are on the wash unit, so they won't be any pain or discomfort and their health will not be jeopardised In any way.
- For clients whose scalp requires some TLC, the hot steam treatment is particularly effective. The steam opens the pores of the skin, allowing sebum to exit, as well as any trapped liquids and toxins. This acts as a 'detox treatment' for the hair and scalp. For those with dandruff, it also works as an anti-dandruff treatment, as the steam melts dandruff flakes, working as an exfoliating treatment and allowing for their easy removal, as well as immediate reduction in inflammation and itching. As the steam, combined with massage, increases circulation in the scalp, this also allows for the production of thicker and healthier hair and more durable growth. The steam also relaxes and loosens the muscles in the head, and with the massage these effects are boosted, effectively reducing irritation and pain typically associated with trichodynia – a condition where a person experiences a painful sensation on their scalp.
